**It's a New Day at New Moon!
(new menu, new décor, new vibe)**

BURLINGTON VT, August 27, 2018 – After 11 years (and much listening to our guests) we've given ourselves permission to dream...and to be creative, reinventing ourselves in alignment with our vision, Rebecca Christie, New Moon's Café Manager announced today.

The Café vision describes New Moon as "A place with a life giving atmosphere in which to enjoy creative eating and authentic espresso."

To support that vision we're enhancing our space, creating new areas to accommodate our guests' comfort and needs: community tables for larger groups, lap top bars with individual USB plugs, bag hooks and lights for computer users, new relaxed seating around our fireplace...and novel exhibits of local artists' work, says Christie.

Our sandwiches, salads, soups and breakfast selections will all be new – while still honoring the tastes of our health-conscious customers. We've been guided by input from our guests and from world class consultants.

The new menu will continue to highlight local produce reflecting the flavors of Vermont's changing seasons. It will consist of simple, seasonal, healthy real food, made from scratch, locally sourced and beautifully presented. Vegan, gluten free, as well as meat eaters will all continue to find their niche at New Moon.

"We're particularly excited to introduce a refined, innovative selection of coffee and espresso drinks, locally roasted from Vivid Coffee Roasters in Winooski."

The new New Moon will have bright white walls showcasing live-edge local maple lap top bars from Tree house Mill Shop, as well as local wood accent walls, also from Tree house. Reclaimed barn wood will accent other areas of the Café. The Genesis Tree of Life chandelier, a signature of New Moon, will remain.

New Moon will continue to offer a creative catering menu to Burlington and beyond.

The Café will be closed for all the renovations from Aug 12th and reopen with new everything on August 27th.
